SKILLS

AI & Build

Cursor, Claude, GPT-4, Playwright, prompt workflows, E2E validation

Frontend

React, Next.js, TypeScript, JavaScript, Tailwind CSS

Backend

Node.js, REST / JSON, Electron, Firebase, PostgreSQL, Prisma, Drizzle, Socket.IO

Ship & Ops

Vercel, GitHub Actions, rapid prototyping, end-to-end ownership

EDUCATION

Bachelor's degree

Azerbaijan State University of Languages
2019

Rauf Pashabayli

AI-Native Product Engineer

SUMMARY

I architect and ship production products with Claude and Cursor — workflow design, structured prompts, and hands-on validation of auth, queues, scoring, and failure handling. Three public systems live at justtrj.vercel.app: Price Radar, Pulse, and Middocs. Additional shipped work is under NDA and shown upon interview. Delivered 0→1 in days, not months. Stack: TypeScript, Next.js, React, Node, Electron, Firebase, PostgreSQL, Playwright.

EXPERIENCE

Independent Product Engineer · Self-employed

Jan 2026 – Present

Solo owner from architecture through production deploy using AI-assisted development (Cursor, Claude, GPT-4). Public links below are live and testable.

Public production

- **Pulse** — Windows instrument: live neuron map of real TCP (Npcap), OS-level cut of a destination. Electron, Next.js · pulse-beryl-one.vercel.app
- **Price Radar** — Paste a product URL; scrape live price, store history, alert when it crosses the floor. Node, Playwright, Prisma, PostgreSQL · price-tracker-psi-red.vercel.app
- **Middocs** — Realtime collab editor: two accounts, one Y.Doc, live cursors. React, Yjs, Socket.IO, Redis, PostgreSQL · frontend-mauve-psi-fk8zi9x14v.vercel.app

Under NDA — showcase upon interview

- **Hire Desk** — Job-hunt ops console: multi-source ingest, scoring, daily queue. Next.js, Firebase.
- **Lead Desk** — Lead ops: parsers, score, operator console. Next.js, Firebase, Playwright.
- **FOAMCORE** — B2B portal: 4 role dashboards, RFQ, realtime updates. Next.js, Firebase, Drizzle, PostgreSQL.
- **Orbital C2** — Real-time 3D satellite command dashboard, 6 screens. React, Three.js, Node.js, Socket.IO.

Sterile Processing Technician · St. Francis Hospital · Hartford, CT

May 2025 – Present

- Ensured sterilization protocols, equipment compliance, and inventory management in a high-volume clinical environment.
- Coordinated with clinical staff to optimize workflow and maintain safety standards under strict process requirements.
